Objective

To apply my developing skills in machine learning, data analysis, and web development, while consistently learning and delivering tasks on time, to contribute to innovative AI solutions and support data-driven decision-making.

Education

University of Mumbai

B.E Computer Science (Artificial Intelligence and Machine Learning)

Nov. 2022 – Present

Thane, Maharashtra

Relevant Coursework

- Data Structures
- Database Management
- Artificial Intelligence
- Statistics For Data Science
- Machine Learning
- Python

Experience

TechLearniversity

Feb 2025 – April 2025

Software Developer Intern

Remote

- Developed the user interface of a job portal web application using React and Tailwind CSS.
- Built a certificate generator tool that automated digital certificate creation for course and event completions, improving efficiency for academic staff.
- Created responsive and accessible pages for job listings, applications, login/signup, and user profiles.

Projects

Bitcoin Price Prediction | *Python, yfinance, Streamlit, LSTM, GRU, RNN*

December 2024

- Collected historical Bitcoin price data using the **yfinance** API for time series forecasting.
- Developed and compared deep learning models (RNN, GRU, LSTM) for Bitcoin price prediction.
- LSTM model achieved the lowest RMSE (1907 vs. 2580+ for RNN and GRU).
- Built a Streamlit-based web app to visualize actual vs. predicted prices using the LSTM model.

Brain Tumor Classification | *Python, Xception, CNN, Saliency Maps, Gemini API*

March 2025

- Developed a deep learning model for brain tumor classification using two approaches: pretrained Xception and a custom CNN.
- Achieved over 95% accuracy with the Xception model and 90%+ with the custom CNN.
- Integrated saliency maps to generate heatmaps highlighting tumor-affected brain regions for interpretability.
- Used Google Gemini API to generate detailed textual descriptions explaining the predicted brain tumor type.

Technical Skills

Languages: Python, Java, C, HTML, CSS, JavaScript, SQL

Developer Tools: VS Code, GitHub

Technologies/Frameworks: React, Django

Leadership / Extracurricular

OJUS - APSIT

Nov 2023 – Feb 2024

Technical Core Member and Co-Head

Thane, Maharashtra

- Collaborated with team members to integrate both creative and functional elements into the official sports website.
- Developed and maintained the website using HTML, CSS, and JavaScript, ensuring responsiveness and high performance.
- Contributed as a core technical team member and served as Co-Head, managing responsibilities across web development and team coordination.

Coding Profile / Certification

- Solved 300+ coding problems in Java on platforms such as : LeetCode, HackerRank, CodeChef.
- Completed the Supervised Machine Learning by Andrew Ng on Coursera.
- Earned certificate for Java Programming from Oracle Academy.
